

Pansies are still available

Now is a great time to plant. Planting while the ground is cool gives you a better chance for success.

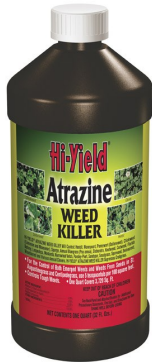

The tree or shrub will be rooted out before the heat of our Louisiana summer rolls around.

Scan the code below to go straight to our website.

Prepare your lawn for spring

If you want a beautiful **WEED FREE** lawn this spring, now is the time to get started. By spraying while your grass is dormant, you are able to treat your weeds before your lawn flushes out with new growth this spring.

← Atrazine treats both existing weeds as well as weed seeds in St. Augustine and Centipede lawns.

← Weed Free Zone controls over 80 of the toughest to control broadleaf weeds like, clover, ivy, buttonweed, and Bermuda grass.

Now available in a hose end sprayer– No measuring needed!

Apply both to your lawn now while the weather is cool.

follow all labels and instructions
