Check our weekly availability posted online at www.PlantTechBR.com and call to reserve your favorites.

Additional Varieties **COMING SOON**– Pansy, Viola, Cabbage, Alyssum and more!

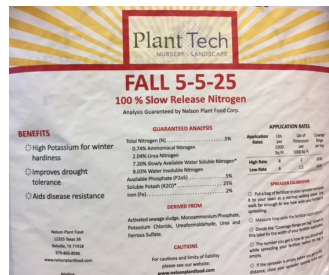

PRUNING: Now is the time to cut back your knock out roses. We prune ours 3 times a year. When you prune, leave foliage below the cut. This allows the roses to flush out, become full and bloom more. After you prune apply a 12.6.6 fertilizer.

← Winterize your lawn

Winterizer- Fall Application. 5 . 5 . 25

A fall application of fertilizer helps your lawn recover from summer stress and prepares the turf for dormancy. A high level of Potassium promotes hardiness, root growth and improves turf health for the winter. This product combines traditional controlled release and activated bio-solids to provide a complete lawn food. One bag treats 2700-3500 sq. ft.
