

Seasonal plants are heavy feeders. Meaning they like to be fertilized regularly during their short life cycle. Bedding fertilizer has micronutrients & slow release nitrogen to aid in growth & blooms!!

**Keys to seasonal color success**

**Fertilizer**

**Fungicide**

**= SUCCESS**

## FALL COLOR

**Fall annual color available!!!**

**Alyssum, Calendula, Cabbage, Kale, Dianthus, Viola**

**MULCH**— Finish off your beds around your shrubs and trees with a fresh layer of mulch. A 2" layer of mulch helps to retain moisture and prevent weed seeds from germinating.

**CAUTION** when mulching your seasonal color! Too much mulch can hold moisture and cause your plants to rot.

**Now is a great time to plant**

**Camellia Sasanqua** →

are a great low maintenance evergreen that blooms in the winter.
