MULCH— Finish off your beds around your shrubs and trees with a fresh layer of mulch. A 2" layer of mulch helps to retain moisture and prevent weed seeds from germinating. **Plant Tech stocks over 15 types of mulches to complete your landscape.**

CAUTION when mulching your seasonal color! Too much mulch can hold moisture and cause your plants to rot.

LAWN WEEDS

Now that the weather has cooled off; you can spot treat your lawn for weeds. **Use Weed Free Zone** to treat the most common lawn weeds.

Clover, Lespedeza, Poison Ivy, Purslane, Ragweed, Spurge, Virginia Buttonweed.....the list goes on and on!
