

## Winter Planting

Winter is an ideal time to install new trees and shrubs.

Cooler weather allows the new plants to grow and become established before the heat of our summers.

The key to new planting success is not to plant the shrub or tree too deep!! Planting too deep causes the hole to hold water and rot the roots of the plant.

Keep your plants well drained!!!

**Gift Certificates Available**

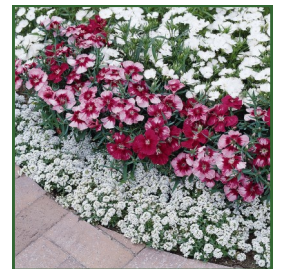

## Merry Christmas

Use your fall color to add a little Holiday Cheer to your yard. There are lots of options for your yard besides the typical Poinsettia.

Combine crimson Snapdragons, picotee Dianthus and Alyssum to provide a layered and colorful showing in your yard. →

Baskets add a TON of holiday cheer no matter the color!! We grow a variety of baskets in different combinations, sizes in a range of prices.

## Get lawn weeds under control early

Spray your lawn with a combination of Atrazine and Weed Free Zone during these cold months.

Atrazine controls both emerged weeds and weeds from seed in St. Augustine and Centipede grass. Do not spray near trees.

Weed Free Zone controls over 80 of the toughest to control broadleaf weeds including clover, Virginia Buttonweed, Poison Ivy.

Be sure to read the labels before applying these products to your specific lawn.
