

Time to prune  
Sasanquas &  
Knock Out Roses

Cut back knockout roses 3 times a year to have full, bloom filled shrubs. Cut them as soon as they are done blooming. Don't be afraid to cut them hard this time of year .

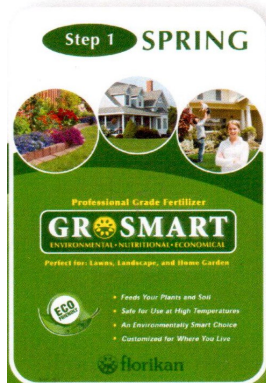

Pruning allows the roses to flush out and become full.

-----  
Wait until the middle of March to prune back any winter damage in your yard.

Agapanthus, Iris, Ferns, Flax Lily, Abelia, Palms, Bananas, Ginger

## — Spring Application —

### ← GroSmart Lawn Fertilizer

**LAWN:** The most important thing you can do for your lawn is feed it! A well-fed lawn can better withstand heat, cold, drought, mowing, foot traffic and other stresses. Feeding your lawn in the spring strengthens roots, fights against weeds and provides a good start for the heavy growing season. If you sprayed your weeds in January; fertilize your yard with the GroSmart spring fertilizer program.

Apply Ferti-Lome weed and feed AFTER you have cut your lawn twice.. You have to have an actively growing lawn for it to be effective.

### **BEDS, SHRUBS AND TREES:**

You should fertilize your trees and shrubs **3 times** a year with these slow release granular products.

We recommend a 12.6.6 **MARCH / JUNE/ SEPTEMBER**

**Unfertilized vs. Fertilized**

A 9 month fertilizer is also available.

### **The difference is easy to see!**

Scheduled applications of fertilizers will green up your plants, stimulate blooms and strengthen the roots.

## Stop weeds and bugs before they happen

← Dimension is a pre-emergent herbicide that prevents weed seeds from germinating in your flower beds and lawns. Broadcast over your existing beds every three months year round.

Bug Blaster is a granular insecticide that should be applied to your flowerbeds and yard to keep out most bugs and insects.

Includes: Ants, Grubs, Fleas, Ticks and Chinch bugs
