**Camellia
Sasanquas.**
Cut when they are
done blooming and
apply a slow release
fertilizer.

— Fertilize —

Your plants need food !!!

Introducing **13.6.6** specially blended for our Plant Tech customers. A dose of this nitrogen, phosphorous and potassium rich fertilizer will green up, stimulate blooms and enrich the roots of your plants.

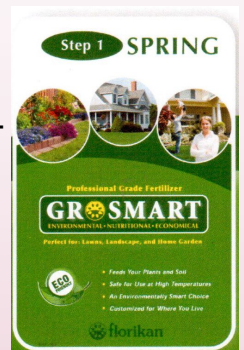

Use on your bedding plants, trees and shrubs.

You should fertilize your lawn and shrubs **3 times** a year with these slow release granular products. — **MARCH / JUNE/ SEPTEMBER**

LAWN:

The most important thing you can do for your lawn is feed it!. A well-fed lawn can better withstand heat, cold, drought, mowing, foot traffic and other stresses. Feeding your lawn in the spring strengthens roots and provides a good start for the heavy growing season.

***If you sprayed your weeds in January fertilize your yard with the **GroSmart** spring fertilizer program.

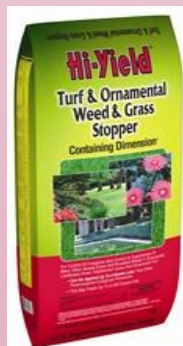

Lawn Weed and Feed is also available at Plant Tech

Apply a weed and feed product **AFTER** you have cut your lawn twice.

Stop weeds and bugs before they happen

Dimension is a pre-emergent herbicide that prevents weed seeds from germinating in your flower beds and lawn. **Apply to your existing beds every three months** year round for best results.

Bug Blaster is a granular insecticide that should be applied to your flowerbeds and yard to keep out most bugs and insects. Controls Fleas, Fireants, Ticks, Mole Crickets, Chinch Bugs and many more.
