

Nutsedge is an aggressive weed this time of year.

It is difficult to control and spreads easily. Generic weed and feed products will NOT target this grass. Pulling this weed will only cause it to spread.

SedgeHammer is one of the only selective herbicide that will kill nutsedge in turf grass or landscaped beds.

Delivery available

Caladiums and Vinca!

Caladiums and Vinca are now available!! To view our entire list of available colors and varieties visit our website at www.PlantTechBR.com

A Fungicide is crucial for seasonal color success!!

Apply ACTINO-IRON or NELSON COLOR STAR to the ground before planting your seasonal color. A fungicide suppresses and controls soil borne funguses that cause root rot.

Bring in your baskets from last season

WE CAN REPLANT THEM

Potted Plants will dry out faster than shrubs and seasonal flowers planted in the ground. Check them daily to keep them from drying out.
