

SedgeHammer is one of the only selective herbicide that will kill nutsedge in turf grass or landscaped beds.

**Bring in your baskets from last season**

**WE CAN REPLANT THEM**

**Delivery available**

## Caladiums and Vinca!

**Caladiums and Vinca are now available!!**

**Vinca does not like to be over watered. Overwatering can cause root rot and a soil fungus.** A Fungicide is crucial for seasonal color success!!

NELSON COLOR STAR is a fertilizer and fungicide in one. Apply to the ground before planting your seasonal color. A fungicide suppresses and controls soil borne funguses.

**Tropicals are still available.**

Bougainvillea, Macho Fern, Heliconia, Hibiscus (shrub & tree form), Mandevilla, Brazillian Orchid, Passion Vine and the list goes on and on!

**Watering your lawn and shrubs.**

Watering your lawn in the morning is ideal. It reduce loss off water due to evaporation and reduces the chance of developing a fungus.

Newly planted shrubs and trees will require more attention. Keep these plants well watered while they become acclimated. Water well and allow shrubs to dry slightly between waterings.
