Watering

It is best to water your shrubs and lawn thoroughly then let it dry out slightly.

Nothing likes to stay wet.

Deep watering promotes strong roots, and healthy plants. If you have irrigation it doesn't mean larger trees, shrubs or potted plants are getting enough water.

Check regularly and add water when necessary.

— Summer application —

That's right.....time to fertilize again. June is an important month for your yard. During the heat of the summer your trees, shrubs and lawn need attention. To keep your yard protected and treated, it is time to **REAPPLY** your Fertilizer, Pre-Emergent Herbicide and Insecticides.

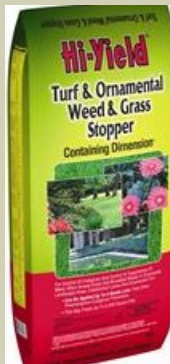

****Remember the trick to these chemicals is to apply every three months. MARCH, JUNE, and SEPTEMBER.**

LAWN:

Whether you applied the GroSmart spring step or Weed and Feed this Spring; now is the time to apply the **GroSmart Summer step 2** on your lawn. GroSmart is a fertilizer designed for our southern climate. It will help sustain your lawn through our hot summer. — **ONLY \$ 12.50 for 1,700 sq. ft.**

*****If you are still having weeds pop up in your lawn you can spot spray with Weed Free Zone if weather is below 90 degrees.**

Dimension is a pre-emergent herbicide that prevents weed seeds from germinating in your flower beds. Broadcast in your existing beds and lawn every three months year round.

Bug Blaster is a granular insecticide that should be applied to your flowerbeds and yard to keep out fleas, ticks, chinch bugs Great for preventing red ants. These products can be used in your flowerbeds and lawns!

SHRUBS AND TREES:

Apply Our PlantTech blend of 13.6.6 ,  slow release granular fertilize to your flower beds, trees, shrubs and seasonal color every three months.

Lichen is a common fungus. It is not particularly harmful but it is a sign your plant or tree is not actively growing.

ALL of these products are available at Plant Tech
