

**Nutsedge is still an aggressive weed this time of year. SedgeHammer is the solution!! The new formula includes the surfactant!! No mixing required!!!!**

**To avoid the heat, work in your yard early morning or late afternoon. Don't forget Plant Tech is open on Saturdays till noon to help with your projects!!!**

## Tips for the Summer Heat

- Dead head Roses and seasonal color to promote new bloom.
- Pinch back leggy stems to encourage branching and fullness.
- Apply mulch around tree and shrubs to retain moisture
- Plants suffering from iron deficiency would benefit from a dose of Iron this time of year. We would recommend Ironite. →
- Avoid digging or transplanting during the heat.

## Heat tolerant plants

Caladium, Hibiscus, Potato Vine, Coleus, Lysimachia, Lantana.

These varieties can withstand the intense heat. Try these options to give your yard a pop of color during this hot summer weather.
