

Nutsedge is still an aggressive weed this time of year. Don't pull it! Pulling it will cause it to spread. Instead spray it with **SedgeHammer**

Mosquito Beater

Treat your yard and keep away, gnats, flies, moths, and mosquitoes!!

Summer Heat

Baton rouge has had an extended period with high temperatures and no rain. Water is the number one issue we are seeing this time of year. Water your plants regularly but allow them to dry slightly between waterings. Keep an eye on plants near or directly under larger trees. These larger trees can absorb a majority of the moisture.

- Water at the base of the shrub to avoid leaf fungus or burning.
- Avoid digging, transplanting and pruning during the heat.
- Adjust your irrigation timers each season.
- Mow your lawn at a high setting.

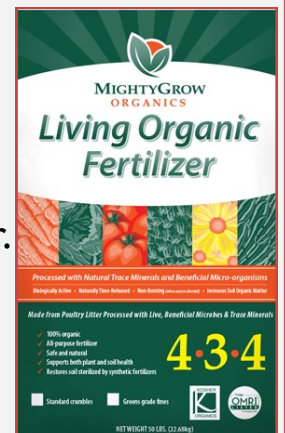

Irrigation and Timers are helpful in the heat.

Add a timer to your irrigation or soaker hose to provide adequate water to your shrubs and lawn.

Organic option for your lawn.

If you haven't fertilized your lawn yet this summer OR are looking to green it up; this product is for you. Living Organic Fertilizer 4-3-4 is a pelletized, pure poultry litter fertilizer. Mighty grow provides living beneficial micro-organisms and trace minerals back into your soil. It is a great option to use in your gardens, and lawn.
