

**Brown patch** is one of the most destructive of all turf diseases. It is a fast spreading and destructive fungus.

It often occurs when seasons change with hot days and cool nights.

If you have the disease **DO NOT FERTILIZE**. You will only spread the brown patch.

Treat with **F-Stop**, a granular fungicide that is both a curative and preventative. Apply to your entire lawn!!!!

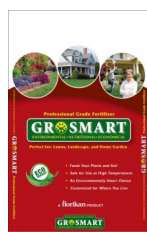

## — Fall —

### ← **BEDS, SHRUBS AND TREES:**

New bag = same great product. Florikan 12.6.6. is a great all purpose fertilizer. It is time to reapply this slow-release granular to your trees, shrubs, flower beds and seasonal color.

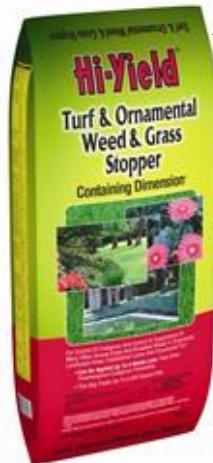

Benefits of this late fall application, include better fall/ winter color; earlier spring green up and improved growth.

**WAIT TO FERTILIZE YOUR LAWN.....** Due to our South Louisiana climate we recommend waiting until **October** to apply the GroSmart Fall step to your **lawn**. This product should be applied during the cooler winter months. The high level of Potassium promotes root hardiness and improves turf health during the winter.

## Herbicides and Insecticides

Weeds, bugs and mosquitos can get out of control this time of year. Apply these granular Pre-Emergent herbicides and Insecticides to prevent weeds and insects.

← **Dimension** is a pre-emergent herbicide used in ornamental landscape areas, and established lawns. It will prevent weed seeds from germinating in your flower beds. Sprinkle over your existing beds every three months, year round.

**Bug Blaster** is a broad spectrum insecticide that controls insect pests in lawns and landscapes. Bug Blaster should be applied throughout your yard to control fire ants, fleas, ticks, mole crickets, chinch bugs, crane flies, scorpions, and other listed pests.

ALL of these products are available at **Plant Tech**
