

**Worms and caterpillars** cause small holes in the leaves of your trees, shrubs or vegetables. Apply Thuricide to treat these insects.

**Now that the weather is cooling slightly you can prune/ tip your knock out roses.**

**Don't forget to fertilize after pruning.**

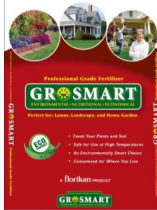

**Lichen is a sign of a lack of fertilizer.**

Apply a slow-release granular like 13.6.6. around the base of the tree to promote growth. A copper fungicide can also be applied to treat the lichen itself.

September is the time to reapply the same slow-release granular to all your trees, shrubs and flower plants.

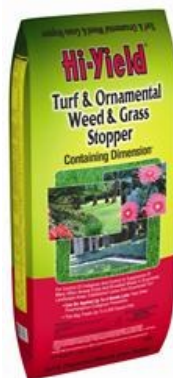

Benefits of this late fall application, include better fall/ winter color; earlier spring green up and improved overall health.

**WAIT TO FERTILIZE YOUR LAWN.....** Due to our South Louisiana climate we recommend waiting until **October** to apply the GroSmart Fall step or a winterizer to your **lawn**.

## Herbicides and Insecticides

The key to weed prevention is continued application of a Pre-Emergent herbicides. Apply every 3 months year round.

Dimension is a pre-emergent herbicide used in ornamental landscape areas, and established lawns. Apply to your flowerbeds and lawns to prevent weed seeds from germinating. This can be applied over your existing landscape.

Bug Blaster is a broad spectrum insecticide that controls insect and pests in lawns and landscapes. Bug Blaster should be applied throughout your yard to control fire ants, fleas, ticks, mole crickets, chinch bugs, crane flies, scorpions, and other listed pests.
